Medi(t)ations computers / music / intermedia

Australasian Computer Music Conference

11 - 14 July 2006

Keynote Speakers

Synaesthesia and Cross-Modality in Contemporary Audiovisuals
Mitchell Whitelaw

Audiovisual Collaboration & The Future
klipp av (Nick Collins & Fredrik Olofsson)

Mitchell Whitelaw is an academic, writer and artist with interests in new media art and culture, especially complex generative systems and digital sound and music. With a background in music and the visual arts, his work has continued to move between media. His sonic work has emphasised live sampling and improvisation in the ensemble Omnivore (with Phil Slater and Greg White), and in solo performance and recording. In 2001 his work with processed field recordings was released by Irish label Fällt in their celebrated invalidObject series. More recently he has been investigating audio mosaicing techniques and data sonification. 2006 saw a return to visual and interactive work, after a long hiatus, with the generative series boom.

Whitelaw's writing has also spanned sonic and other new media modalities, with a focus on generative techniques and an approach based on tech-nically engaged critique and interpreting the work in its cultural context. His writing on sound and music has focused on the "post-digital" scene, analysing its wider implications and its own discursive constructions in papers such as "Inframedia Audio" (2001) and "Sound Particles and Microsonic Materialism" (2003). In 2004 his work on artists using artificial life was published in the book Metacreation: Art and Artificial Life (MIT Press, 2004). Other re-cent work has considered creative data sonification, and critical approaches to generative visual art. He is currently a Senior Lecturer in the School of Creative Communication at the University of Canberra.

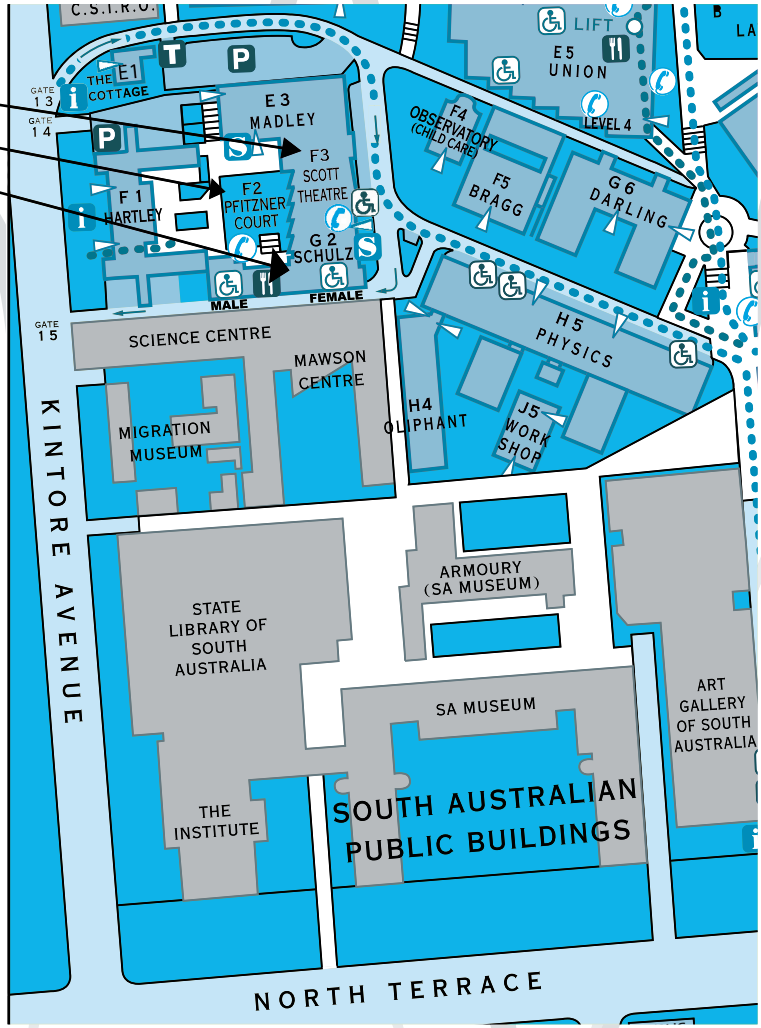

klipp av (Nick Collins and Fredrik Oloffson), the Swedo-Anglish audiovisual duo are committed to exploring the possibilities of audiovisual analysis and synthesis in live concert work. They confront the problems of insufficient improvisation and live relevance to the location in laptop performance. The audio is interactive and generative, adjusted on the fly by the medium of live coding. The video/generative graphics machine is passed state information on the generative algorithms employed in the audio (rather than tracking the bare audio out). Audio and visual material is extracted from the performance environment to engage with the space. Automated analysis routines assist the fast cataloguing of events as audio-visual composites. An essential facet of the improvisation is the dialogue with event generating algorithms and the mappings themselves. Video can also send information to control audio, and audiovisual feedback is a possibility between the networked machines. Performance follows a continuum from correlation to contest between audio and visual modalities.

Nick Collins, on his return from Australia, will submit his PhD in the Faculty of Music, Cambridge University, where he has been working under the supervision of Dr. Ian Cross and Dr. Alan Blackwell. The title is 'Towards Autonomous Musical Agents: Real-time Beat Tracking and Event Analysis for Live Computer Music'. He has previously been a music technology lecturer and computer music researcher in London and a film special effects R&D engineer for Sony. He has a Masters degree in music technology from York University, and a first degree in mathematics from Oxford. He is co-editing the Cambridge Companion to Electronic Music with Julio d'Escrivan, for release in 2007.

Fredrik Olofsson, the Berlin based Swede, plans to continue his work as a freelancing artist with too many interests. Since 2000 he has put quite some effort into avoiding composing music - for which he was formally trained at the Royal University College of Music in Stockholm. That pursuit has led him into the areas of visuals, programming and electronics. As a video artist he has collaborated with a multitude of performance artists, dancers and improvising musicians. As a programmer he worked as a research fellow for Professor Mark d'Inverno at the University of Westminster investigating multi-agent systems and sound. In electronics he has built interactive installations with among others the group/project Musicalfieldsforever.

Tuesday

Time	Item	Where	Title	Name
9:00	Registration	PC		
9:30	Welcome	S10	Introduction	Stephen Whittington
9:45	Keynote 1	S10	Synaesthesia & Cross-Modality in Contemporary Audiovisuals	Mitchell Whitelaw
10:30	Tea	PC		
11:00	Speaker	S10	Medi(t)ations	Peter McIlwain
11:30	Papers 1	S10	Ideas for a Poetics of Intermedia	Stephen Whittington
			Sounds from Level Four	Tristan Louth-Robins
			Visualising Music with Impromptu	Anna Gerber & Andrew R. Brown
12:30	Lunch	PC		
13:30	Concert 1	ST	Illuminated Breath	Brigid Burke
			Palus Somni	Bruce Schneider
			Catalogue with Analogues	Dugal McKinnon
			Exposiciones	Andrian Pertout
			Tala Malika Jak	Lydia Ayers
14:30	Break	PC		
14:45	Papers 2	S10	Synthesizing the Chinese Suona	Lydia Ayers & Andrew Horner
			Ancient Geo-physical Computers, Advanced Acoustic Patterns & Biofeedback	Darren Curtis
			The Ambidrum: Ambiguous Generative Rhythms	Toby Gifford & Andrew R. Brown
			Imitation of the Human Drummer & Beyond: An Advanced Rhythm Generator	Mark Webber
16:00	Tea	PC		
16:30	Papers 3	S10	Hey, are you Listening to or Watching the Music?	Barry Hill
			“See Hear Now”: Reflections on a Multi-Arts Performance Festival	Matthew Hill
			Weaving Relaptionships between Sound & Image in Improvised Performance	Roger Alsop & Paul Fletcher
17:30	Break	PC		
18:00	Concert 2	ST	Parallax	Paul Rudy
			Battle Metris	Mark Havryliv &Terumi Narushima
			Squelch	Thom Blum
			The Play Aesthetic	Andrew Brown & Andrew Sorensen
19:00	**End**			

Wednesday

Time	Item	Where	Title	Name
9:00	Poster	PC		
10:00	Forum	S10	History is Junk	Forum + Tea
11:00	Papers 4	S10	The Sonic Artificial Ecosystem	Alan Dorin
			Composing with Nodal Networks	Peter McIlwain, Jon Mc-Cormack, Alan Dorin & Aidan Lane
			The Perpetual Commotion Machine: An Exploration of Background Music, Genetic Algorithms & Physical Proportion	Tim Swalling
			Algorithm Gadget: An Improvisatory Rhythm Generator	Alex Thorogood
			Review of Compositional Morphing: Works, Techniques, Applications & Possibilities	Rene Wooller
12:30	Lunch	PC		
13:30	Concert 3	ST	NGC 4594: Sombrero Galaxy	Christopher J. Keyes
			Black Aspirin Zero	Christian Haines
			balanfô	Daniel Blinkhorn
			Cymbolic	Amanda Cole
			Untitled	Ross Bencina
14:30	Break	PC		
14:45	Papers 5	S10	Toward a Dramaturgy for Theatre Sound-Scoring Design	Kevin Purcell
			Sound Performance within an Augmented Reality Theatre Context	Alistair Riddell
			Evolution, Mutation & Hybridity: the Influence of Biotechnology Practices on the Development of Chromosome Knitting	Catherine Fargher & Terumi Narushima
			Building Lightbridges: The Australian Electroacoustic Music Experts Network	John Coulter & Colin Webber
16:00	Tea	PC		
16:30	Papers 6	S10	Playing With Audio: Towards a Genuine Relationship between Game Play & Music	Mark Havryliv
			The Mill on the Floss: A Case Study in the use of Voice & Electronics in the Theatre	Donna Hewitt
			ArtsSync: A New Tool for Mapping Foreground, Middle-ground & Background Musical Structures to Visual Images	Christopher J. Keyes
17:30	Break	PC		
18:00	Concert 4	ST	Where Your Treasure Is	David Rylands
			Shifting Ground	John Coulter
			The Colours Between	Leah Barclay
			Dreamlake improvisation	Roger Alsop & Paul Fletcher
			Field	Massimiliano Viel
			Mandala 5	Greg Schiemer
19:00	**End**			

Thursday

Time	Item	Where	Title	Name
9:00	AGM	S10	Australasian Computer Music Association - Annual General Meeting	
10:00	Forum	S10	Medi(t)ations	Forum + Tea
11:00	Papers 7	S10	Sonic Gesturing: Utilising a Wearable Interface in Live Electroacoustic Performance	Somaya Langley
			Haptic Carillon: Sensing & Control in Musical Instruments	Mark Havryliv, Greg Schiemer & Fazel Naghdy
			Creating Acoustic Space	James L. Barbour
			DIY Physical to Computer Interactivity: Background, Issues & Solutions	Sebastian Tomczak
			The Microtonal Legacy of the Pocket Gamelan	Greg Schiemer & Mark Havryliv
12:30	Lunch	PC		
13:30	Concert 5	ST	[re]	Somaya Langley
			Artificier artificiel	David Hirst
			Visions From Hell	Angelo Fraietta
			Defibrillator	Julian Knowles
14:30	Break	PC		
14:45	Papers 8	S10	A Critical Analysis Model for Electroacoustic Music for ACMC 2006	Leah Barclay
			Listening to Mediation: Digital Noise in a Post-High-Fidelity Age	Greg Hainge
			An Analysis of Denis Smalley's Wind Chimes: Some Preliminary Results	David Hirst
			Fundamental Frequency as an Attribute of Eco-Structuralism	Timothy Opie
16:00	Tea	PC		
16:30	Keynote 2	S10	On Audiovisual Collaboration & the Future	klipp av (Nick Collins & Fredrik Olofsson)
17:30	Break	PC		
18:00	Concert 6	ST	Alvin	Donna Hewitt & Julian Knowles
			Bogorodica 28.08	Robert Sazdov
			Anechoic Pulse	Panayiotis Kokoras
			Tourist x2	Somaya Langley & Nick Mariette
			C60: Small Voices From the Earth	Stephen Gard
			Medi(t)ative (Mor)phing	Rene Wooler
19:00	**End**			

Friday

Time	Item	Where	Title	Name
9:30	Workshop 1	AL	SuperCollider: Third Party Libraries and Customising	klipp av (Nick Collins & Fredrik Olofsson)
9:30	Workshop 2	PL	HERCs: Introduction to algorithmic synthesis	Robert Wolf
12:30	Workshop 3	EMU	Electronic Sensor Building: An Introduction	Angelo Fraietta
15:30	Workshop 4	PL	AudioMulch: Advanced Workshop	Ross Bencina
18:30	**End**			

Asylum

Tuesday - Thursday

Time	Item	Where	Title	Name
9:00	Installation	AS	Three Sounds on Buildings	Brigid Burke
			The Autonomy Interviews	Poppi Doser
			GraveShift	Per Bloland
			Evochord	Gordon Monro
			Synchronised Swamp	Pierre Proske
			Sounds from Level 4	Shoot Collective & Tristan Louth-Robins
18:00	**End**
